English

Petya ransomware, along with its variant GoldenEye, has struck governments, companies and individuals worldwide. This ransomware outbreak is so disastrous that even those who have patched their Windows systems may still get attacked, causing huge financial losses.

To fight against cybercriminals, 360 has created Ransomware Decryption Tool to save computers hijacked by ransomware. This tool can bring back files from more than 80

For Windows 10/8.1/8/7/Vista/XP (32,64bit)

To unlock a Petya-infected PC, please take the steps below.

### 【Decryption instructions for the Petya's GoldenEye variant】

1. Download [360 Ransomware Decryption Tool](#)
2. Open 360 Ransomware Decryption Tool and click the yellow banner on the top to start the decryption process.

Encryption algorithm. There is no way to restore your data without a special key. You can purchase this key on the darknet page shown in step 2.

To purchase your key and restore your data, please follow these three easy steps:

1. Download the Tor Browser at "https://www.torproject.org/". If you need help, please google for "access onion page".
2. Visit one of the following pages with the Tor Browser:

http://goldenhjncvc2l1d.onion/pTdymco8  
http://golden2uqqiqcs6j.onion/pTdymco8

3. Enter your personal decryption code there:

pTdymc-o8f8RS-KWQXec-LNaQ9d-yui3Qi-78MCMk-FSjjKL-riJAXC-4oYjfZ-aPSafC-1pj1RG-kmNd4q-oeLdxs-RGsfRq-sCdWq1-gp6Zo3

If you already purchased your key, please enter it below.

Key: aa541f1cabe928e06974f99d0345a4cf\_

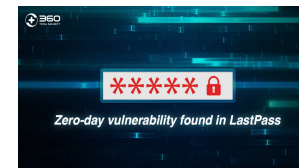

**6. Important Note:** If you entered the key incorrectly, you would see the message below. In this situation, **do not continue to enter the key. Reboot your PC and enter the key again.**

If you are using Windows 7 or a later version, Petya encrypts not only your system but also files in the infected PC. The hijacked files are appended with an 8-character extension name. The ransomware also creates a file "YOUR\_FILES\_ARE\_ENCRYPTED.TXT" in the desktop folder.
